

Mobile Medical Case

The Mobile Medical Case (MMC) is a unique standalone multi-device examination system for portable or stationary use, controlled by a dedicated touch screen user interface. It integrates modern communication tools making telemedicine operation reliable and affordable.

- Recommended for Screening, Telemedicine and eHealth projects
- Wide range of examinations: ECG, SPO2, NIBP, Spirometer, Urine Analysis, Blood Glucose, Cholesterol...
- User friendly operation via touch screen commands
- Ideal for remote areas, emergency, primary care and disease outbreak control
- Video consultation for second opinion
- Powered via Tablet PC, rechargeable battery
- Most components can be used as stand alone
- Robust, water resistant case with compression compensation valve
